

G3-GAMA Joint Solutions is a trusted SBA 8(a) certified SDB enterprise enabling our customers to achieve their strategic mission.

We leverage our strengths in delivering quality IT, Cloud, and management services and solutions through a results-driven staff and a focus on technological innovation.

CORE CAPABILITIES

CLOUD SERVICES

We collaborate to deliver cloud strategy and expertise in infrastructure virtualization, developing and deploying cloud-based applications, migrating websites and applications to the cloud, delivering virtual desktop services and applications, and implementing private, public, and hybrid cloud solutions in environments such as Amazon Web Services, Microsoft Azure, and Google Cloud Platform.

ENTERPRISE SOLUTIONS

We provide consolidation and integration enterprise services and governance while maintaining existing development pipelines and management systems ensuring no disruption in operations and smooth migration to new consolidated enterprise shared services.

CYBER SECURITY

We provide end-to-end Information Assurance, Information Security, Cyber Security, and Data Protection and Privacy Services for developing and managing IT security programs where assessing, analyzing, monitoring, and mitigating enterprise security risks are crucial for mission success.

IT OPERATIONS AND MANAGEMENT

Our engineers and scientists are accustomed to working with the complexities of Federal programs, policies, and technologies. Our approach to supporting our federal customers in system administration and engineering is founded on our ITIL and CMMI service delivery best practices.

SOFTWARE DEVELOPMENT AND SYSTEMS ENGINEERING

Our certified IT professionals provide science, business systems, and applications support to federal customers throughout the entire development, operations, and maintenance lifecycle.

PROGRAM/PROJECT MANAGEMENT

Our certified Project Management Professionals assist various Federal Government customers with Program/Project Management Office services. G3-GAMA senior level project/program managers also assist a variety of Federal customers in project planning and support, portfolio optimization, strategy consultation, management operations analysis, business operations support, and administrative business support.
